## Summary

The total number of international tourist arrivals to Sri Lanka during March 2023 was 125,495. This is an increase of 17.8% compared to March 2022 and reaching 54% pre pandemic levels (2018). The surge in tourism can be credited to several factors including the high season for travel in Sri Lanka, as well as improvements in socio-economic conditions and enhanced

accessibility to the country. Furthermore, the easing of travel limitations in various countries is also a key factor in the recovery of the travel industry. In March, the primary countries from which tourists arrived were the Russian Federation, India, the United Kingdom, Germany, and France.

## Tourist arrivals by region and percentage share March 2023

Map 1. Tourist arrivals by region and percentage share

The majority of tourists visiting Sri Lanka, which accounted for 58.9% of total arrivals, originated from Europe. This rise in tourism is thought to be driven by a buildup of demand from countries like the Russian Federation, the United Kingdom, Germany, and France.

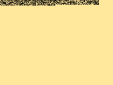

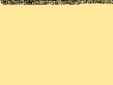

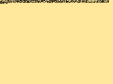

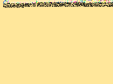

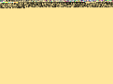

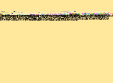

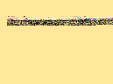

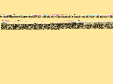

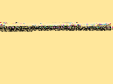

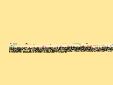

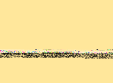

Meanwhile, 30.9% of tourists came from Asia and the Pacific region, 8.1% from the Americas, and 1.4% from the Middle East.

Factors such as the lifting of travel restrictions and improved air accessibility in Sri Lanka could be the factors that contributed to the growth in tourism.

According to UNWTO, international tourism is predicted to continue its recovery in 2023, mainly driven by an increasing demand for travel. However, it is important to note that the sector's growth could be impeded by various challenges such as economic, health-related, climatic, and geopolitical factors, which may affect its sustained recovery.

## March 2023

In March, Sri Lanka received the most international tourists from the Russian Federation, India, the United Kingdom, Germany, and France, with the Russian Federation leading the pack at 20% of total arrivals. The percentage shares recorded for India, United Kingdom, Germany and France were 15%, 9%, 8% and 5%. The Russian Federation remained the primary source of tourism to Sri Lanka due to increased air accessibility, favorable conditions within the country and geopolitical factors. When comparing tourist arrival figures for March 2022, it is notable that there has been substantial growth in arrivals from countries such as Russia, Australia, China, and the United States. The growth rates recorded for Russia and Iran, in particular, were remarkable, as they increased by 101% and 265%, respectively, compared to pre-COVID levels in March 2019. In contrast, France and Germany had the lowest growth rates in comparison to March 2022, which could be attributed to negative travel advisories and perceptions about Sri Lanka.

In contrast, there was a decrease of 14.3% in tourist arrivals from the United Kingdom and an 18.3% decrease in tourist arrivals from India compared to March 2022. This decline in tourist arrivals could be attributed to factors such as a reduction in Sri Lankan diaspora visiting their friends and relatives and a preference for short-haul destinations such as Spain, Italy, and France, especially among tourists from the United Kingdom. Comparing the decline in tourist arrivals to March 2019, the United Kingdom and China recorded drops of 63% and 87%, respectively, which could be attributed to COVID-related travel restrictions, particularly in China.

Overall, the growth in tourist arrivals for Russia and Iran and the decline in arrivals from the India and the United Kingdom could be indicative of shifting trends in outbound travel preferences and changes in travel patterns.

# Tourist arrivals by purpose of visit

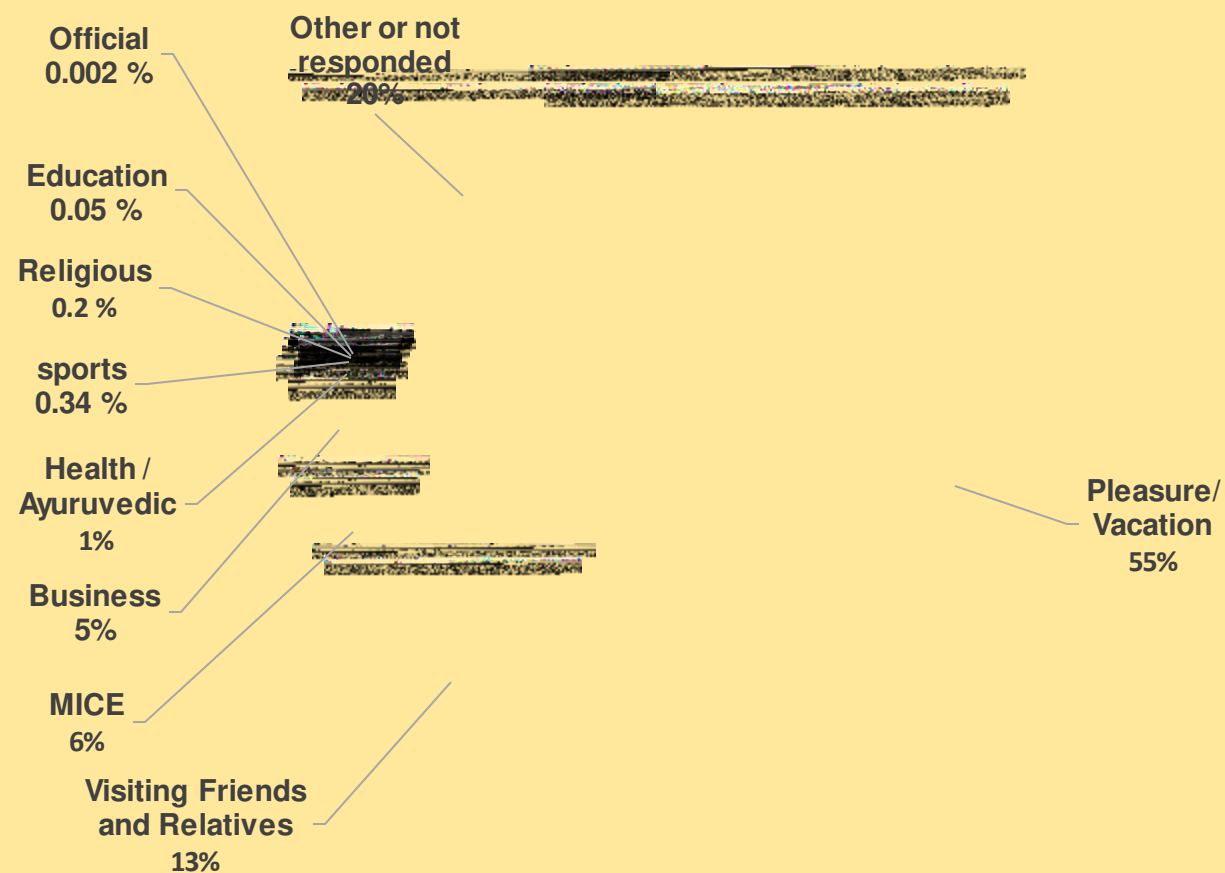

## March 2023

The purpose of visit for tourists in Sri Lanka was analyzed and it was revealed that 55% of them came for pleasure or vacation. Visiting friends and relatives was the primary purpose for 13% of tourists, while only 5% came for business-related reasons. In addition, 6% of tourists visited for MICE purposes, and a small percentage, 1% and 0.3%, came for health/Ayurvedic and sports-related purposes, respectively..

The main reason for visiting Sri Lanka among tourists from the top source markets such as Russia, India, Germany, the United Kingdom, France, and Iran was for pleasure or vacation, which accounted for the majority of their visits. Specifically, 43.3% of Russian tourists, 55.4% of Indian tourists, 69.6% of German tourists, 53.2% of British tourists, 73.8% of French tourists, and 71.9% of US tourists visited Sri Lanka for this purpose. Notably, the majority of Canadian tourists (61.3%) and Australian tourists (53.2%) visited Sri Lanka to see their friends and relatives, likely due to the presence of Sri Lankan diaspora in these countries. Only 30.4% of Canadian tourists and 31.3% of Australian tourists came for pleasure/vacation purposes. Additionally, 22.3% of Indian tourists and 12.6% of Chinese tourists visited Sri Lanka for business-related purposes.
